

Recommendation Letter for Jaishree Janu

I hereby confirm that **Jaishree Janu** has been volunteering with ReDI School of Digital Integration and supporting our projects since February 2024. ReDI School is a non-profit organization based in Berlin that teaches coding and design skills to create jobs and foster economic empowerment for refugees and newcomers.

As Community Coordinator for ReDI School Berlin's Digital Career Program, I have had the pleasure of working closely with Jaishree and supervising her contributions as a volunteer in teaching and coaching. Jaishree has taken on the role of session leader for the **Python Foundation** course, working alongside a teaching team. She has demonstrated a strong commitment to sharing her knowledge, managing a team of learners, and addressing inquiries on topics related to her expertise. She has also undertaken various tasks and responsibilities that have both highlighted and strengthened her exceptional skills and knowledge. Her key contributions include:

- Leading sessions in the **Python Foundation** course for a group of learners, along with a teaching team
- Assisting in the development of the curriculum and lesson planning for the course
- Providing feedback and participating in retrospective sessions
- Tracking students' attendance and progress throughout the semester
- Responding to weekly inquiries
- Coordinating with the ReDI team to enhance the course and improve the experience for both students and teachers
- Creating content and coordinating projects and team handovers

Jaishree was with us as a volunteer for one semester, fully committed to her role. She shared her extensive experience by supporting content creation and project coordination, and she played a pivotal role in her teaching team and within the school, consistently demonstrating a high level of dedication, flexibility, and responsiveness. Beyond her teaching and content expertise, Jaishree consistently shows a caring attitude toward her learners. She has proven to be a versatile, proactive, and diligent individual with a strong work ethic and a solid foundation in intercultural communication, teaching, and leadership.

For all these reasons, and because I believe in her quality as a professional, I confidently affirm that Jaishree possesses a high level of expertise in **Python** and team management. I am available at any time to provide further information regarding her performance and skills.
